## What

The IGOP provides advice to the Socio-Educational Intervention System (SIS) of Prat de Llobregat to evaluate the impact of the new model of intervention with children at social risk.

The application of a mixed evaluation model contributes to build scientific evidence that includes not only the measurement of risk reduction and increased protection achieved by the innovation in public services, but also to understand how this change has been received by users and how it has been implemented by the different services, identifying limitations and potentialities to improve its implementation.

## Who

Dr. Ismael Blanco, Dr. Margarita León and Dr. Lara Maestripieri are in charge of the project.

## Why

In 2017 the Generalitat de Catalunya defined a new model of non-residential Socio-Educational Intervention Services (hereinafter SIS) for children and adolescents at risk and their families, modifying the previous model where open centres are the only care services for this group. In 2020, the Social Action Service of the City Council published the document "Framework Project. Construction of the municipal model of socio-educational intervention for the deployment of non-residential socio-educational intervention services (SIS) for children, adolescents and their families at risk in the city of El Prat de Llobregat". Almost 2 years after its implementation, in 2022 it is considered necessary to carry out an impact assessment of the implementation of this model.

## **How**

After the corresponding bibliographical review, the implementation review is carried out by means of interviews with key actors of the project, with responsibilities for its design and implementation. Next, the dimensions and issues to be evaluated are defined by organising a workshop/session with the different technical agents involved in order to gain an in-depth understanding of the governance of the project, the objectives initially set, adaptations during its implementation, the actors and their profiles. Finally, the evaluation strategy is designed.

## **When**

2022-23.

### RESUM PER A LA PREMSA

---

“Feu un escrit, en llenguatge planer, on es destaquen els aspectes més rellevants de la recerca que dueu a terme. Extensió orientativa del text: 150 paraules. Per tal de guiar-vos, us recomanem que al llarg del text doneu resposta les següents qüestions:

- *Quin són els objectius principals de la recerca?*
- *Quin beneficis pot aportar el projecte a les persones i a la ciutadania?*
- *Quines són les principals innovacions que presenta el projecte?*
- *Per què és important fer recerca en aquesta àrea?*”

El IGOP presta asesoramiento al Sistema de Intervención Socioeducativa (SIS) del Prat de Llobregat para evaluar el impacto del nuevo modelo de intervención con infancia en riesgo social.

La aplicación de un modelo de evaluación mixta contribuye a construir evidencia científica que incluya no sólo la medida de la reducción del riesgo y el aumento de la protección alcanzada por la innovación en los servicios públicos, sino también entender cómo este cambio se ha recibido por parte de los usuarios y cómo se ha implementado desde los diferentes servicios, identificando limitaciones y potencialidades para mejorar su implementación.
